Axel

Bug when deleting movie assets

CisTEM crashed when I tried deleting all the movie assets, here is the bug report.

```
(cisTEM:14541): GLib-GObject-CRITICAL **: g_object_notify: assertion 'G_IS_OBJECT (object)' failed
```

```
(cisTEM:14541): Gtk-CRITICAL **: IA__gtk_tree_selection_unselect_iter: assertion 'selection->tree_view->priv->model != NULL' failed
```

```
[1]+ Segmentation fault (core dumped) ~/cistem/cisTEM
```

I am running on CentOS 7, on an intel workstation off the precompiled binaries.

timgrant

Did it all look ok when you

Did it all look ok when you restarted?

Axel

Yes

Yes

timgrant

Ok, thanks I will look into

Ok, thanks I will look into it.

Saba Shahzad

Hi Tim

Hi Tim

I also got the same error and cistem crashed while performing CTF. Any suggestion or fixes for this ?

Best

Saba

timgrant

Hi Saba,

Hi Saba,

Does it always crash? Or did it just crash once?

Tim

Fri, 10/16/2020 - 11:44 (Reply to #7)

Saba Shahzad

It crashed twice. Thinking

It crashed twice. Thinking that maybe it's linked to a large (3k only!) number of micrographs, dividing into subsets let me overcome the issue temporarily.

Best

Saba
