cisTEM GUI display issue

Hi,

The GUI was displayed extra large as shown in attached pic.

How could I fix it? Thanks.

Hi,

Hi,

What system is this? It looks like the font scaling has gone crazy. Do other programs look ok?

Hi Tim,

Hi Tim,

It's CentOS 7.x for our Sherlock cluster.

I had no problem with cisTEM before, but it appeared like this since yesterday. Other programs look ok.

timgrant

Hi,

Hi,

Are you connecting remotely? If so, are you using a remote desktop or ssh? I don't think this is an issue with cisTEM, it seems more likely it is an issue with your remote session having the wrong dpi or something like that. You could try changing the dpi with something like :-

```
xrandr --dpi 96
```

Then restart cisTEM and see if helps.

Tim
