Identify refinement package

Hi,

Can someone tell how can I track which refinement package I used for a finished Ab Initio 3D job?

Thanks,

Raja

timgrant

I'm afraid I don't think this

I'm afraid I don't think this is possible at the moment, I don't think it is stored anywhere.

Tim

Yah. I don't see any Ab

Yah. I don't see any Ab Initio3D tab under result section. Sometime you may have created multiple refinement package and you forgot which pkg you used for the run. But, I saved the Scratch/Startup folder before I click the Finish tab. Even in that folder I could not find any file that have saved the informaion of input setup, like which refinement package I used for the Ab Initio 3D run.

Raj
