Can cisTEM process other file formats than .mrc ?

Hello,

A simple question, I am new to this cryoEM data processing field. Can cisTEM process other file formats than .mrc, such as .mrcs or .TIFF for example?

niko

Yes, MRC images and stacks,

Yes, MRC images and stacks, as well as TIFF files are all valid inputs. TIFFs can only be used for movies and micrographs, though. Please read the Documentation.
