installing cisTEM on Mac

Hi All,

does anybody have any experience in using cisTEM on Mac?

Cheers,

Moshen

timgrant

Hi Moshen,

Hi Moshen,

The GUI does not currently work on Mac, but we are working on that - and a Mac version is getting closer.

The command line programs should work on Mac.

Tim

Great! ... Thanks

Great! ... Thanks

jparmachepSU

installing cisTEM on Mac

Hi Tim,

Is there any update on this front? With the github source, can one compile the software for Mac currently, or is it still not possible?

Best,

Jean-Paul
