Import error

Unsure if this is a bug or not. When attempting to important a stack from Relion, I get the following message:

Error: Cannot read star file

Error: Encountered the following error - aborting -

Error: Couldn't find _rlnDefocusU in star file

I've tried several star files to test whether one was corrupt or incorrect, doesn't seem to make a difference.

Thanks!

Ray H.

timgrant

Hi Ray,

Hi Ray,

Do you have an entry for _rlnDefocusU in the star file?

Cheers,

Tim

That's a great question. It

That's a great question. It appears not so why is beyond me - I've checked all of the files I tested. So cisTEM is doing its job! Good work!!
