mrhansenable

please keep developing!

we love cisTEM ! thank you!

but please keep developing it to add functionality. Most of all please create an update that keeps meta information for particle stacks so that they can be exported afterwards. Right now cisTEM is a last stop only for processing particle stacks because originating micrograph names are lost!

thanks again!

timgrant

Thank you, this is certainly

Thank you, this is certainly on the list of features to include.

Tim
