## Binary files for installation

Hello all,

I have recently started using cisTEM, and I wish to install the cisTEM on a AMD Ryzen 3990 Threadripper equipped computer which I am accessing remotely right now. however i cannot do it via the normal tar.gz file installation, could i have access to the binary installation files which would enable me to directly install the program on to the computer? Thanks in advance.

Hi Maulik,

Hi Maulik,

Can't you download the binaries and run them? There is a link on the homepage?

Also, if running on AMD, you may wish to take note of this post :-

<https://cistem.org/potential-speedup-mkl-operations-amd-ryzenthreadrippingerepyc>

Thanks,

Tim
