Download not working

Hello,

I want to try out cistem but cannot manage to download cistem-1.0.0-beta-intel-linux.tar.gz from the software page.

The download fails shortly before finishing.

I tried this on different computers (Windows / Ubuntu), browsers (Firefox / Chrome) and days.

Any ideas how to resolve this?

Best,

Tim

niko

Please try this download link

Please try this download link (copy and paste into your browser):

<https://cistem.s3.amazonaws.com/cistem-1.0.0-beta-intel-linux.tar.gz>

The new link works

Thank you niko!
