Corrupted particle stack file

Dear all,

I have a corrupted particle stack file. Can I create a new one from the information in the DB?

Thanks in advance,

Rodrigo

Solved: Corrupted particle stack file

Dear all,

After a relaxing weekend, it Just came to my mind that I could create a new Asset (with the same parameters as the corrupted one) and then copy the resulting mrc file. It seems to work, with all processing information of the particles preserved.

Thanks,

Rodrigo
