Arne

mask in manual refine

Dear developers,

we have noticed a small bug in the manual refine, if a mask was applied it is not noted in the job details on the result section - it says no mask was applied.

This not super crucial only important for bookkeeping and tracing what I have done in the past.

cheers

Arne

timgrant

Hi Arne,

Hi Arne,

This will be fixed in the next release, until then - if you need the information you can read it directly from that database.

A description of how to do that can be found here :-

https://cistem.org/refine-job-details-not-correct

Cheers,

Tim
