Exporting or accessing Particle Positions

Dear cisTEM team,

Good job on this really nice software! I was wondering if there is an option for exporting particle coordinates or somehow accessing the particle positions listed in the table in Assets?

Best,

Rasmus

Re: Exporting or accessing Particle Positions

Hi Rasmus

I've tried the "export" function in cisTEM, writing out particle coords in relion format. It's working well.

"Assets" --> "Refine Pkgs" --> "Export", you could export to relion or frealign format.

Hi Ming,

Hi Ming,

Thanks for the tip! Don't know why I didn't think of that... But thanks again.

Best,

Rasmus
