cisTEM GUI

Hi,

I was wondering if there was a good way to detach submitted jobs from the GUI.

This is really a fantastic software but having to maintain the GUI in order to keep your jobs running is a bit of a pain.

Many thanks,

Greg

timgrant

Hi Greg,

Hi Greg,

Currently there is no way to do this. What I personally do is run my session in x2go (or i guess any other remote desktop session).

Then you can disconnect / reconnect to the remote desktop.

Hope that is useful!

Tim
